

ISOMATE® LBAM PLUS

Strawberries - Grapes - Caneberries

“Proven technology
and superior products
for over 30 years”

Mating Disruption Technology for Light Brown Apple Moth

ISOMATE LBAM PLUS is a pheromone dispensing technology for management of light brown apple moth. **LBAM PLUS** uses the same proven technology as our other Isomate dispensers. A single application before LBAM biofix will provide season-long protection. The twist-tie design allows for fast, easy application.

PACIFIC BIOCONTROL CORPORATION

ISOMATE LBAM PLUS slowly releases pheromone for season-long mating disruption of Light Brown Apple Moth

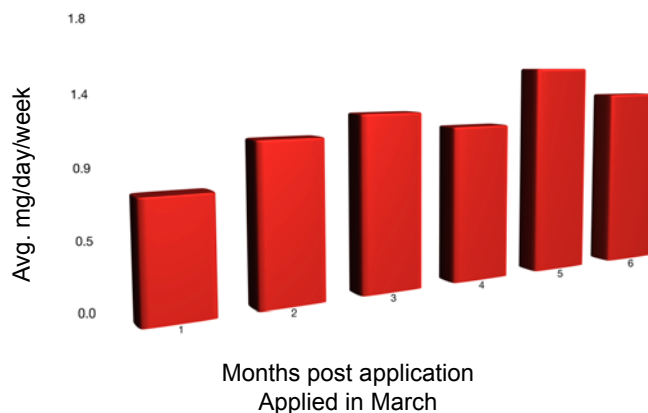

- High pheromone load rate provides season-long mating disruption.
- Apply at a rate of 200-300 dispensers per acre.
- Superior dispensing technology delivers consistent, uniform release rate.
- Cost-effective, season long control.
- Extensively tested by leading university and public institutions.
- Real-time dispenser analyses available at www.pacificbiocontrol.com.
- Highly trained and experienced staff in mating disruption technology and IPM.
- Most widely used mating disruption technology in the world.
- Compatible with other control methods.
- Not toxic to bees or beneficial insects.
- Requires no worker re-entry period or pre-harvest interval.
- Provides greater flexibility to schedule other crop management activities.
- Residue free.
- No groundwater contamination when used as directed.
- Not affected by rainfall.
- Acceptable for the Mexico and Canada cane berry export programs.
- **WORRY FREE MATING DISRUPTION!**

ISOMATE LBAM PLUS IS FAST AND EASY TO APPLY
