

ISOMATE® PTB TT

"Twin-Tube" Design
for even *faster* application

Superior Mating Disruption Technology for Peach Twig Borer

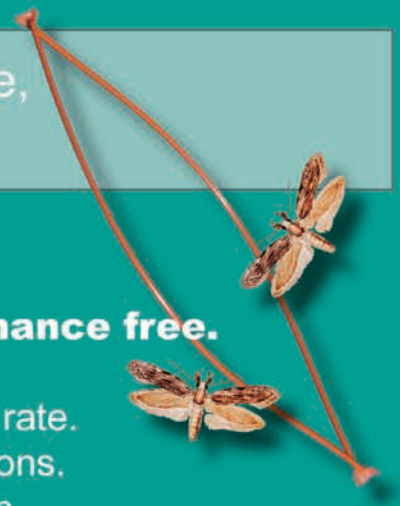

ISOMATE PTB TT is a pheromone dispensing technology for management of peach twig borer. **ISOMATE PTB TT** uses the same proven technology as our other ISOMATE dispensers. A single application at peach twig borer biofix provides season-long protection. The Twin-Tube design allows for fast, easy application.

PACIFIC BIOCONTROL CORPORATION

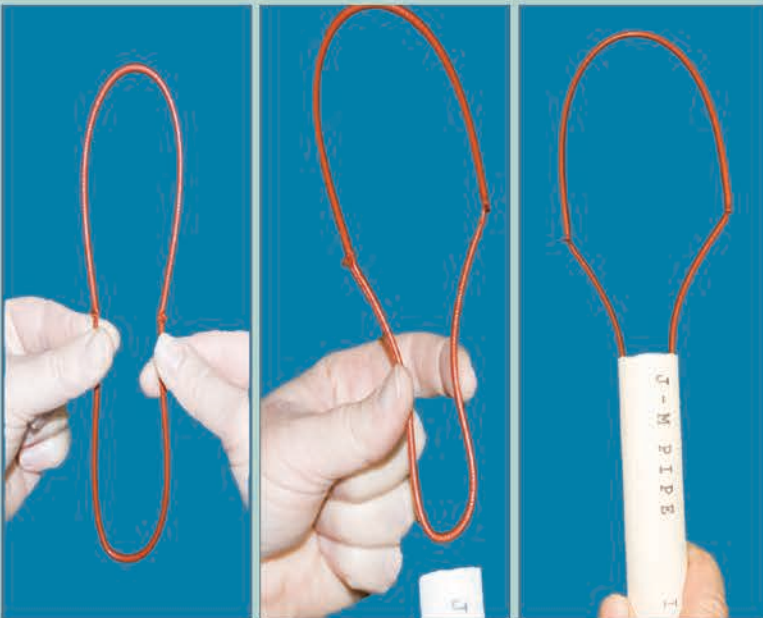

ISOMATE PTB TT is an innovative, cost-effective, easily applied dispenser for control of peach twig borer

- Twin Tube design for easy, quick application.
- Inexpensive and effective mating disruption!
- **No batteries, no programming, no disposal and maintenance free.**
- High pheromone load rate provides season-long mating disruption.
- Superior dispensing technology delivers consistent, uniform release rate.
- Extensively tested by leading universities, public and private institutions.
- Real-time dispenser analyses available at www.pacificbiocontrol.com.
- Highly trained and experienced staff in mating disruption technology and IPM.
- ISOMATE is the most widely used mating disruption technology in the world.
- Compatible with other control methods.
- Long-term use can successfully reduce Peach Twig Borer populations to low levels.
- Not toxic to bees or beneficial insects and mites.
- Residue free.
- No worker re-entry period or pre-harvest interval.
- Provides greater flexibility to schedule other orchard activities.
- No groundwater contamination when used as directed.
- Not affected by rainfall or overhead cooling.
- No phytotoxicity.
- **WORRY FREE MATING DISRUPTION!**

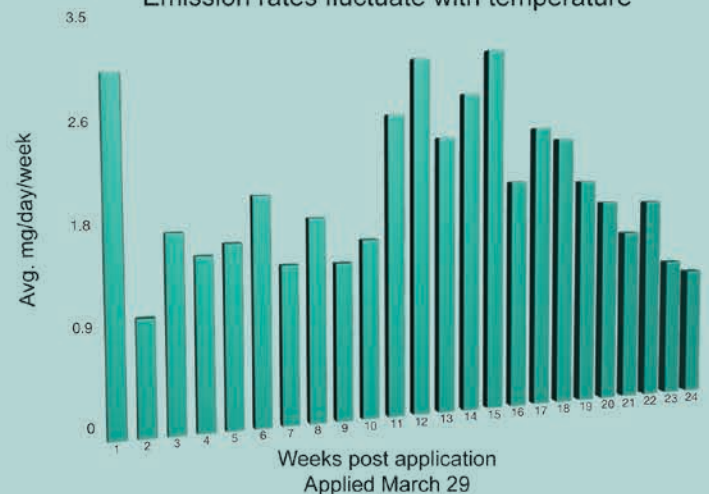

ISOMATE PTB TT IS FAST AND EASY TO APPLY

ISOMATE PTB TT can be applied by hand or by simply separating sides and creating a circle, inserting one end of the dispenser into 3/4" PVC pipe of desired length as shown above and then placing it over a lateral branch. For more information on application, please contact your local Pacific Biocontrol representative or consult our website.
