

# ISOMATE®-CM RING

"CM Ring"

Meso emitter

for even *faster* application

## Innovative Mating Disruption Technology for Codling Moth

**ISOMATE-CM Ring** is a "meso" pheromone dispensing technology for management of codling moth using a new and innovative design.

The "Ring" design allows for fast, easy application with fewer point sources per acre. **ISOMATE-CM Ring** uses the same proven technology as our other Isomate dispensers. Research has shown that a single application of **ISOMATE-CM Ring** provides season long mating disruption.

**PACIFIC BIOCONTROL CORPORATION**

# ISOMATE-CM Ring is an innovative, cost-effective, easily applied dispenser for CM mating disruption in apples and pears

- "RING" design for easy, quick application.
- Inexpensive and effective mating disruption.
- **No batteries, no programming, no disposal and maintenance free.**
- High pheromone load rate provides season-long mating disruption.
- Superior dispensing technology delivers consistent, uniform release rate.
- Extensively tested by leading universities, public and private institutions.
- Real-time dispenser analyses available at [www.pacificbiocontrol.com](http://www.pacificbiocontrol.com).
- Highly trained and experienced staff in mating disruption technology and IPM.
- Isomate is the most widely used mating disruption technology in the world.
- Compatible with other control methods.
- Long-term use can successfully reduce CM populations to low levels.
- Not toxic to bees or beneficial insects and mites.
- Residue free.
- No worker re-entry period or pre-harvest interval.
- Provides greater flexibility to schedule other orchard activities.
- No groundwater contamination when used as directed.
- Not affected by rainfall or overhead cooling.
- No phytotoxicity.

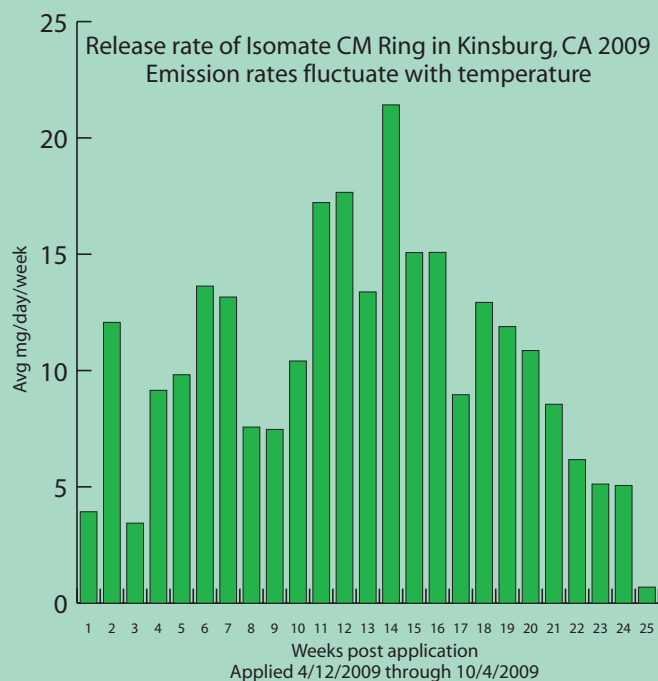

## ISOMATE-CM RING IS FAST AND EASY TO APPLY

CM Ring can be applied by ground or by platform. One person can easily apply up to 4 acres of CM Ring per hour. For more information on CM Ring, please contact your local PBC representative or consult our website.

**Very cost-effective!**
